

MitoChronia

A hybrid exhibition within the fields of Art and Mitochondria
Art in Perpetuity Trust

6 Creekside, Deptford, London SE8 4SA

Thursday 7th May 2026 to Sunday 17th May 2026. Thursday to Sunday 12 pm to 5 pm

Private View 6 - 8 pm Thursday 7th May

www.cipango.co.uk/mitochronia

Participants: Shuhei Kono | Paul Malone | Nicola Rae | Huan Wang

Life was nothing but green slime over a billion years ago, consisting of mats of bacteria. They didn't do very much but were good at staying alive. Then, after a few million years, one of these decided it would be a good idea to live inside of another. These were called mitochondria. They provided energy to the host and in return were granted protection from the elements and various predators. Using various methods in this exhibition pursues this theme between the metabolic discoveries in the science and their expression in the field of art.

Curated by Paul Malone and Nicola Rae.

Curatorial Assistance by Haoyue Chen and Yuen Zhou
