

Perpetuum Mobile

To the casual observer the world appears in a constant state of perpetual motion organising itself into structures of increasing complexity. In this exhibition, sixteen artists from six countries have been asked to re-interpret this phenomenon in terms of their own creative practice.

From the philosophical to the humorous and the sublime to the absurd, the artworks present an interpretive response to the issues of cyclicity, entropy and what the ancient Greeks used to call hyperaxia, or 'ableness to be'.

Perpetuum Mobile is an international exhibition curated by Paul Malone, Nicola Rae and Mickey Dell.
